## Proof of Vaccination - Liability Waiver & Release Form

Ferrets are recommended to receive **rabies** and **canine distemper** annually. Rabies can be life threatening to both animals and humans. Ferrets should be given the FDA-approved rabies vaccine. Rabies prevents against infection and is recommended, along with Canine Distemper (CD), however they should not be given at the same time. CD is an airborne disease can be brought into your home through clothing and shoes and ferrets have a 100% mortality rate for unvaccinated ferrets that come into contact and contract CD.

If your ferret(s) have shown a previous allergy to either vaccine, they should not receive further vaccinations. BRFR will still take and care for your ferret(s), as long as you understand the risks. If your ferret has any allergies to vaccines, please bring a copy of your ferret(s) vaccine allergy history so we are able to document in our system.

If your ferret(s) have been vaccinated, please list the date last vaccinated for both CD and Rabies below:

Last Date for **Distemper**: \_\_\_\_\_ Last Date for **Rabies**: \_\_\_\_\_  
(Make sure to bring a copy at drop off or email a scanned copy to [blueridgeferretrescue@gmail.com](mailto:blueridgeferretrescue@gmail.com))

**If you cannot vaccinate your ferret, or they have not been vaccinated yet, please initial one or more of the reasons below:**

I have not been able to vaccinate my ferret(s) because of financial, personal reasons OR deny to give my ferret(s) the vaccination.

My ferret(s) cannot be vaccinated due to vaccine allergy or a type of allergic reaction

My ferret(s) are not old enough at this current time to be vaccinated for either rabies and/or canine distemper

I am unable to have my ferret vaccinated due to my vet not having the proper vaccines in stock

By signing below, I acknowledge I am the owner of the pet described above. I understand the possibilities and risks if my ferret(s) should acquire distemper or rabies virus if your ferret(s) have not been vaccinated. I understand that BRFR is not responsible for any ferret that becomes ill or dies from contracting rabies or CD and understand that I will receive a copy of signed waiver with both BRFR and my signatures stating agreement to ferret(s) being dropped off.
